

CARSOFT®

Diagnostic System for BMW and MINI Vehicles

Carsoft for BMW - and NEW: Mini - Vehicles

is the ultimate diagnostic solution for BMW - and Mini - vehicles even including cars of 2006. Carsoft is specializing in the diagnosis of BMW, where it is without doubt the most actual independent diagnostic system of the market. And it is the only system on the market, providing you not only with detailed error texts and service and coding functions, but with a huge library of context sensitive wiring diagrams, parts locations and repair assistance.

Supported Features:

- Service - interval adjustment & reset
- Live data streams and printing functions
- Component activation
- ECU coding
- Fully CAN BUS compliant
- Extended features for light control modules (read out of real driven mileage), immobilizers, central locking systems and engine control modules, etc.
- Easy to use menu driven Windows based software with wiring diagrams, component location and technical repair assistance
- Single module or Complete System diagnosis
- Troubleshooting text for most stored errors
- Error code reset and service interval reset
- MMI configuration features (Multi Media Interface)
- Easy to install updates (up to twice a year) available
- Worldwide hot-line service

Carsoft for BMW vehicles includes:

- All required cables
 - Carsoft software for vehicles up to 2006
